

Proceedings of the Final Conference in Innsbruck

Sustainability of Constructions Towards a better built environment

Sustainability assessment of buildings and needs of stakeholders <i>Antonín Lupíšek, Tarja Häkkinen, Petr Hájek and Tereza Pavlů</i>	225
Comparison of Eco-Office Buildings from the Viewpoint of Sustainability of Constructions <i>A. Vefa Orhon and Mujde Altin</i>	229
Integrated design of buildings <i>Adrian Ciutina, Viorel Ungureanu, Dan Dubina and Florea Dinu</i>	235
Building sustainability theory meets practice; Opportunities and gaps: the case of GPP and examples from Slovenia and Greece <i>M. Sijanec-Zavrl and C. Giarma</i>	247
Life-Cycle Assessment of Residential Buildings <i>Ricardo Mateus and Luís Bragança</i>	255
LCA of building envelope components - Part 1. A database for Greece <i>C. Giarma, D. Bikas and K. J. Kontoleon</i>	263
LCA of building envelope components - Part 2. The computational tool BENICa <i>C. Giarma, D. Bikas and K. J. Kontoleon</i>	271
Life Cycle Impacts Assessment of Steel, Composite, Concrete and Wooden Columns <i>Barbara Rossi, Ivan Lukic, Naveed Iqbal, GuangLi Du, Diarmuid Cregg Ruben Paul Borg and Peer Haller</i>	277
Environmental Performance of Contemporary Multi-storey Timber Buildings <i>Yu-hsiang Yeh and Peer Haller</i>	285
Comparative Study of the Life Cycle Profile of Residential Masonry and Steel Framed Buildings in Belgium <i>Ligia Massetto de Aquino, Sigrid Reiter and Barbara Rossi</i>	295
Life-cycle assessment of thermal insulation materials for external walls of buildings <i>J. D. Silvestre, J. de Brito and M. D. Pinheiro</i>	303
Life Cycle Assessment of building structure <i>Michele Paleari, Andrea Campioli and Monica Lavagna</i>	311
Life cycle inventory (LCI) of cold-formed hollow structural steel sections for the sustainability assessment of metal structures <i>Iordanis Zygomas, Evangelos Efthymiou and Charalambos C. Baniotopoulos</i>	317
The use of cold formed steel systems for sustainable emergency housing: Application of LCA methodology to a modular construction <i>Ornella Iuorio, Caterina Antonia Dattilo, Gianmaria Di Lorenzo and Raffaele Landolfo</i>	325
Environmental impact assessment of steel residential buildings <i>Öget N. Cöcen, Iordanis Zygomas and Evangelos Efthymiou</i>	333
